

Sunscreen Permission

Bluebonnet makes available to its children a sunscreen formulated for children's skin called Skin Friendly Sunscreen for Kids, SPF 30, made by Rocky Mountain Sunscreen. Rocky Mountain Sunscreen is Paba free, hypoallergenic, fragrance free, waterproof and aloe based. (A list of ingredients is available at the front desk.)

By signing the permission form below, a parent gives permission or does not give permission for a Bluebonnet teacher to apply sunscreen on a child's skin. Some children may need or prefer a special brand, so parents may still provide their own sunscreen if they wish.

Please fill out the form below, checking which option you prefer for your child.

Sunscreen Permission Form

Child's Name

Room #

Each child must have a sunscreen permission form in his or her file, indicating whether the parent gives or does not give permission for sunscreen.

Please indicate your preference below:

_____ I give my permission for Rocky Mountain Sunscreen SPF 30 to be applied to my child by a Bluebonnet teacher.

_____ I do not wish my child to have any sunscreen applied by the school. I will apply sunscreen before my child arrives.

_____ I wish for my own sunscreen, which I have provided and which I have labeled with my child's full name, to be applied to my child at school.
